PERSONAL STATEMENT

I'm a 21 year old Web Developer and Freelancer from Phoenix, Arizona (US) currently based and studying in Hermosillo, Sonora (MX). I love everything from Web Development and Design, to basic Scripting and Machine Learning.

At the moment, I'm looking for opportunities specifically in the field of web development, although I also feel comfortable in other terrains. Constantly learning new tools and technologies and reinforcing my knowledge is my way of growing as a developer.

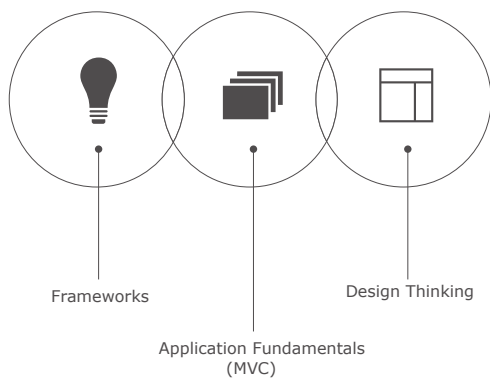

I love teamwork and building things with people with the same passions and work-ethic as me, so what are you waiting for?
